Health
What is it Anyway?
Health Defined

“Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.”
Health Defined

**Infirmity:**

1. A bodily ailment or weakness, especially one brought on by old age.

2. A failing or defect in a person’s character.
Health Defined

“Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.”
Health Defined

“Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.”
Complete, Optimal, Perfect Health?

If you can start the day without caffeine,
If you can be cheerful, ignoring aches & pains,
If you can resist complaining and boring people with your troubles,
If you can eat the same food everyday and be grateful for it,
If you can understand when loved ones are too busy to give you time,
Complete, Optimal, Perfect Health?

If you can overlook when people take things out on you when, through no fault of yours something goes wrong,
If you can take criticism and blame without resentment,
If you can face the world without lies and deceit,
If you can conquer tension without medical help,
If you can relax without liquor,
If you can sleep without the aid of drugs,
“Complete well-being is a fantasy... health is something that happens not so much in the absence of illness as in its presence.”

David B. Morris – Illness & Culture in The Post Modern Age
Redefining Health

“Health is not freedom from the inevitability of death, disease, unhappiness and stress but rather the ability to cope with them in a competent way.”

Illich, Medical Nemesis, 1975
What’s In A Word?

What’s In A Word?

Proto-Indo-European
(2500 - 4500 BC) (*kailo*)
"whole, uninjured, of good omen"

Middle English
(1150 – 1500 AD) (*health*)
physical health and "prosperity, happiness, welfare; preservation, safety."
Health

Where Can You Get It?
Health

How Is It Promoted?
Healthism
Fearmongering
Disease Mongering
Healthism

Healthism is a set of assumptions based on the belief that health is solely an individual responsibility. It includes the concept of the body as a machine that is influenced only by physical factors.

“Healthism”
Health and Morality

“The gift of health, then, is the gift of happiness, of completeness, of love, and of being. To abuse it or to fail to seek it out with all our power is a denial of the value of self. Anyone who disregards the magnificence of life deserves only pity.”

Lillian Grant, 1978
“Healthism”
Health and Morality

“The only tyrant you face is your own inertia and absence of will - your belief that you are too busy to take your own well being into your own hands and that the pursuit of self-health through a wellness-promotive lifestyle is too hard, complicated or inconvenient.”

Don Ardell, 1977
“Healthism”
Health and Morality

Most Common Health Problem in the U.S.? 

• 1 of every 6 Americans living in poverty 
• > 1 out of every 5 children living in poverty 
• Poverty rates double for Blacks & Hispanics 
• 200,000-400,000 preventable hospital deaths 
• A woman is beaten every 15 seconds 

(US Census Bureau – 2010)
“Healthism”
Health and Morality

Most Common Health Problem in the U.S.? "I-Don’t-Care-It is”
“A common condition in which an individual has no interest in adopting a healthy lifestyle.”

(US Census Bureau – 2010)
“Healthism”
Health and Morality

“Our role as wellness professionals is to try to get people to do something they do not want to do. After all, **it is fun to get fat. It is fun to be lazy.** Not everyone likes the taste of fresh fruits and vegetables, they would prefer chocolate, soda, and Cheetos.”
“Fear Mongering”
Blame and Shame

“The deliberate use of fear based tactics including exaggeration and usually repetition to influence the public in order to achieve a desired outcome.”

“Fear Mongering” - NHLBI - USA

Public Service Announcement:

Working Together to Lower High Blood Pressure

It’ll be a warm sunny afternoon at the stadium; the skies are just screaming blue. The beer man is flying up and down the stairs, the crowd is wild ‘cause everybody’s favorite guy is up to bat, up to knocking his umpteenth career homer. The pitch comes, you hear a big loud smack as the ball sails away over that silly embarrassed pitcher, way over left field, high into the sky section, and look, it’s headed right to your seat. You heard me, your seat. But you know what, you quit treating your blood pressure so you had a stroke and you’re dead. And somebody else is in your seat screaming and jumping and waving their glove and guess what, that bozo got your ball. Don’t lose a minute of life. Exercise, eat right, cut the salt, treat your high blood pressure. For more information, call . . .
“Disease Mongering”

“The selling of sickness that widens the boundaries of illness and grows the markets for those who sell and deliver treatments.”

Moynihan, PLoS Medicine, April, 2006;3(4):0425-0428
“Disease Mongering”

- Mild problems cast as serious
- Causes are found in people’s biology
- Can be “fixed” with bio-medical interventions
- Corporate sponsorship of disease
- Less and less diversity is tolerated

Moynihan, PLoS Medicine, April, 2006;3(4):0425-0428
“Disease Mongering”

- Shyness = social anxiety disorder
- Pre-menstrual stress redefined as pre-menstrual dysphoric disorder
- Everyday sexual difficulties = female sexual dysfunction
- Menopause = hormonal disease
“Disease Mongering”

“We salute our heroes. Our mothers, grandmothers, sisters and daughters. Every women who has ever overcome heart disease, cancer, osteoporosis, menopause and depression. Survivors ...remind us to take care of ourselves and make lifestyle choices that can protect us from disease.”
Health
Why Doesn't Everyone Have It?
Shocking News!
CDC and WHO

Chronic Diseases Cause
7 out of 10 deaths
each year in the U.S.!

And it’s your fault!
The Real Causes of Poor Health

“For people above a certain threshold of material well-being, another kind of well-being is central.

**Autonomy** - how much control you have over your life – and the **opportunities you have for full social engagement and participation** are crucial for health, well-being and longevity.”
The Real Causes of Poor Health

If you travel the 12 miles from downtown Washington DC to the suburbs of Maryland, life expectancy increases about 20 years.

57 yrs. at the start and 77 yrs. at the end.

https://www.youtube.com/watch?v=h-2bf205upQ
The Real Causes of Poor Health

“At least 75% of the hazard to longevity can be captured with measures of socioeconomic status and job satisfaction. Socioeconomic status overwhelms and subsumes all the measured biological risk factors for all-cause mortality as well as most other mortal and illness end-points.”

Norton Hadler, 2004
The Real Causes of Poor Health

The Social Determinants of Health (SDOH)

“Conditions in the places where people live, learn, work, and play that affect a wide range of health risks and outcomes.”

https://www.cdc.gov/socialdeterminants/
The Real Causes of Poor Health

You Are Where You Live!
The Real Causes of Poor Health

“Dr. Jon - Are you for real, or are you teasing when you write, "You are where you live" being more appropriate and accurate than "You are what you eat?" Is one to then believe that the nutrition of someone who lives in rich quarters, like a 5 star hotel, (or the White House) is healthier than someone who is impoverished and lives in a slum?”
Solutions: The Wealth & Health Connection
Wealth Inequality in The U.S.

The wealthiest 20 people in the U.S. now own more wealth than half of the entire population in the United States.
Wealth Inequality in The U.S.

The Forbes 400 own as much wealth as the entire African-American population and more than a third of the Hispanic population in the U.S. combined.

Read the report: IPS-DC.ORG/BILLIONAIRE-BONANZA
Wealth Inequality in The U.S.

• Richest 10%... own 75.4% of wealth
• Bottom 90%... own 24.6% of wealth

Top 1/10th of 1% own:
• 1975 - 7% wealth
• 2000 - 15%
• 2017 - > 20%

Wealth Inequality in United States

- **78%** of full-time workers live paycheck to paycheck
- **40%** of adults cannot cover a **$400** emergency expense
- **40 million people** live in **poverty** (“highest income inequality in the Western world”)

Wealth Inequality in The U.S. Impact on Health

- Mortality among white middle-aged Americans with limited education is increasing
- Mortality in every other group & every other advanced country is decreasing
- “An epidemic of suicides and afflictions stemming from substance abuse: alcoholic liver disease and overdoses of heroin and prescription opioids.”

HEALTHCARE STOLE THE AMERICAN DREAM

Here's how we take it back!

You Run a Health Care Business Whether You Like It or Not. Here’s How to Make It Thrive.
Since 2008, General Annual Deductibles for Covered Workers Have Increased Eight Times As Fast As Wages

Rethinking Health
Sudbury & District Health Unit

Health = A rewarding job with a living wage
Health = Food on the table and a place to call home
Health = Having options and opportunities
Health = A good start in life
Health = Community belonging

The most important things you need to know about your health may not be as obvious as you think.

Health = A rewarding job with a living wage
Little control at work, high stress, low pay, or unemployment all contribute to poor health.
Your job makes a difference.

Health = Food on the table and a place to call home
Having access to healthy, safe, and affordable food and housing is essential to being healthy.
Access to food and shelter makes a difference.

Health = Having options and opportunities
The thing that contributes most to your health is how much money you have. More money means having more opportunities to be healthy.
Money makes a difference.

Health = A good start in life
Prenatal and childhood experiences set the stage for lifelong health and well-being.
Your childhood makes a difference.

Health = Community belonging
A community that offers support, respect, and opportunities to participate helps us all be healthy.
Feeling included makes a difference.

How can you make a difference?
Action to improve the things that make ALL of us healthy depends on ALL of our support.
Start a conversation.
Share what you know.

To learn more, call the Sudbury & District Health Unit at (705) 522-9200, ext. 515 or visit www.sduh.com.

“HEALTH FUNCTIONS AS A KIND OF SOCIAL ACCOUNTANT. IF HEALTH SUFFERS, IT TELLS US THAT HUMAN NEEDS ARE NOT BEING MET.”

British epidemiologist and health policy expert, Sir Michael Marmot

Ötzi The Iceman

- Lived in Italy - 5300 years ago
- Very active, lean, nonsmoker
- 5’3” tall – 110 lbs.
- Killed at 45
- **Significant atherosclerosis**

Otzi The Iceman

“Heart disease & atherosclerosis were prevalent throughout antiquity, in people who had dramatically different diets and lifestyles.”

Healthy Pleasures

“Many of us increasingly view ourselves as fragile and vulnerable, ready to develop cancer, heart disease or some other dreaded disease at the slightest provocation. In the name of health we give up many of our enjoyments...
Healthy Pleasures

...The point is that worrying too much about anything - be it calories, salt, cancer, or cholesterol - is bad for you, and that living optimistically, with pleasure, zest, and commitment, is good.

Medical terrorism shouldn't attack life's pleasures.”
