

JOHNSON CONTROLS CAN QUICKLY DELIVER HOSPITAL SOLUTIONS

Johnson Controls has the global experience, national workforce and healthcare expertise to expand hospital capacity and enhance caregiver response for COVID-19. We built medical capability needed to turn the tide in Wuhan.

We were on the front lines in WUHAN installing systems in six days

- We immediately installed a remote medical patient monitoring system for the Shanghai Tongji Hospital isolation area.
- In the first 72 hours, the shelter hospital was rebuilt rapidly, and we deployed the safety assurance system and network communication system.
- In the second 72 hours, we equipped 860 critical beds with Nurse Call systems.

We are an essential part of America's Health Infrastructure

- Johnson Controls solutions are in nearly 85% of North American hospitals
- We have 120 branch locations in North America supported by 25,000 employees
- Johnson Controls is an Essential Services Workforce

Johnson Controls Can Create Additional Capacity and Communications

- Conversion of regular patient rooms to negative pressure isolation units
- Conversion of hotels and dormitories to isolation patient rooms
- Increasing bed count in existing isolation rooms
- Temporary wireless Nurse Call System deployment
- Temporary network expansion (wired/wireless)
- Command and Control Center installations
- Ability to quickly mobilize technical resources –Planning & design engineers, project managers, installers, clinical communication specialists, service technicians for various systems such as nurse call, fire, security, HVAC
