

NLC Presents:

ARPA's IMPACT ON WATER INFRASTRUCTURE BROWN BAG

Friday, June 18th, 2-3 pm EST

Moderator: Brooks Rainwater, NLC – Sr. Executive & Director for Center of City Solutions

Panel: Carolyn Berndt, NLC – Legislative Director for Sustainability/Federal Advocacy

Cynthia Koehler, WaterNow – Co-Founder & Executive Director

Richard Leadbeater, Esri – Global Solutions Manager, State Government & Trade Associations Industries

Francesca McCann, iMG, A Black & Veatch Company – Business Development Director

ARPA: Water, Wastewater, Stormwater Infrastructure

National League of Cities

NLC NATIONAL
LEAGUE
OF CITIES

CITIES STRONG TOGETHER

During an unprecedented time, NLC delivered unprecedented results for our members.

\$65 billion of DIRECT aid to EVERY city, town or village across the country.

nlc.org/stateleague

NLC **DELIVERS**

Coronavirus State and Local Fiscal Recovery Funds – “necessary investments in water, sewer, or broadband infrastructure.”

- Projects eligible under the Clean Water State Revolving Fund
 - Construct, improve, and repair wastewater treatment plants; control non-point sources of pollution; create green infrastructure; manage and treat stormwater; water reuse; protect waterbodies from pollution.
- Projects eligible under the Drinking Water State Revolving Fund
 - Build or upgrade facilities to improve water quality; transmission, distribution, and storage systems; consolidation or establishment of drinking water systems
- Cybersecurity
- Climate Change and Resilience
- Lead Service Line Replacement

Q: How do I determine if my drinking water, wastewater or stormwater project is eligible?

See eligibility guides for [Clean Water](#) and [Drinking Water](#)

Q: Do I need to have an SRF loan in order to use these funds for my water project?

No. And – funds cannot be used for expenses related to financing, fines, settlement costs.

Q: Can a local government transfer funds to a water utility/water district?

Yes. And – under “Revenue Loss” to utilities for unpaid bills; under “COVID/Negative Impact” to households for utility assistance.

Q: Can the funds be used for other types of infrastructure projects and/or projects related to cybersecurity or climate change that are not water/sewer projects?

“Infrastructure” provision vs. “Revenue Loss” provision

Q: Does NEPA and other Federal statutes apply to these funds/projects?

Are you using other federal dollars for your project?

Visit the Treasury webpage for more info about the Coronavirus State and Local Recovery Fund.

[Treasury.gov/SLFRP](https://treasury.gov/SLFRP)

The Treasury expects to provide technical assistance to mitigate administration burden.

For general questions about the Coronavirus State and Local Recovery Fund, email SLFRP@treasury.gov.

Engineering into the Future: Modernizing with ArcGIS

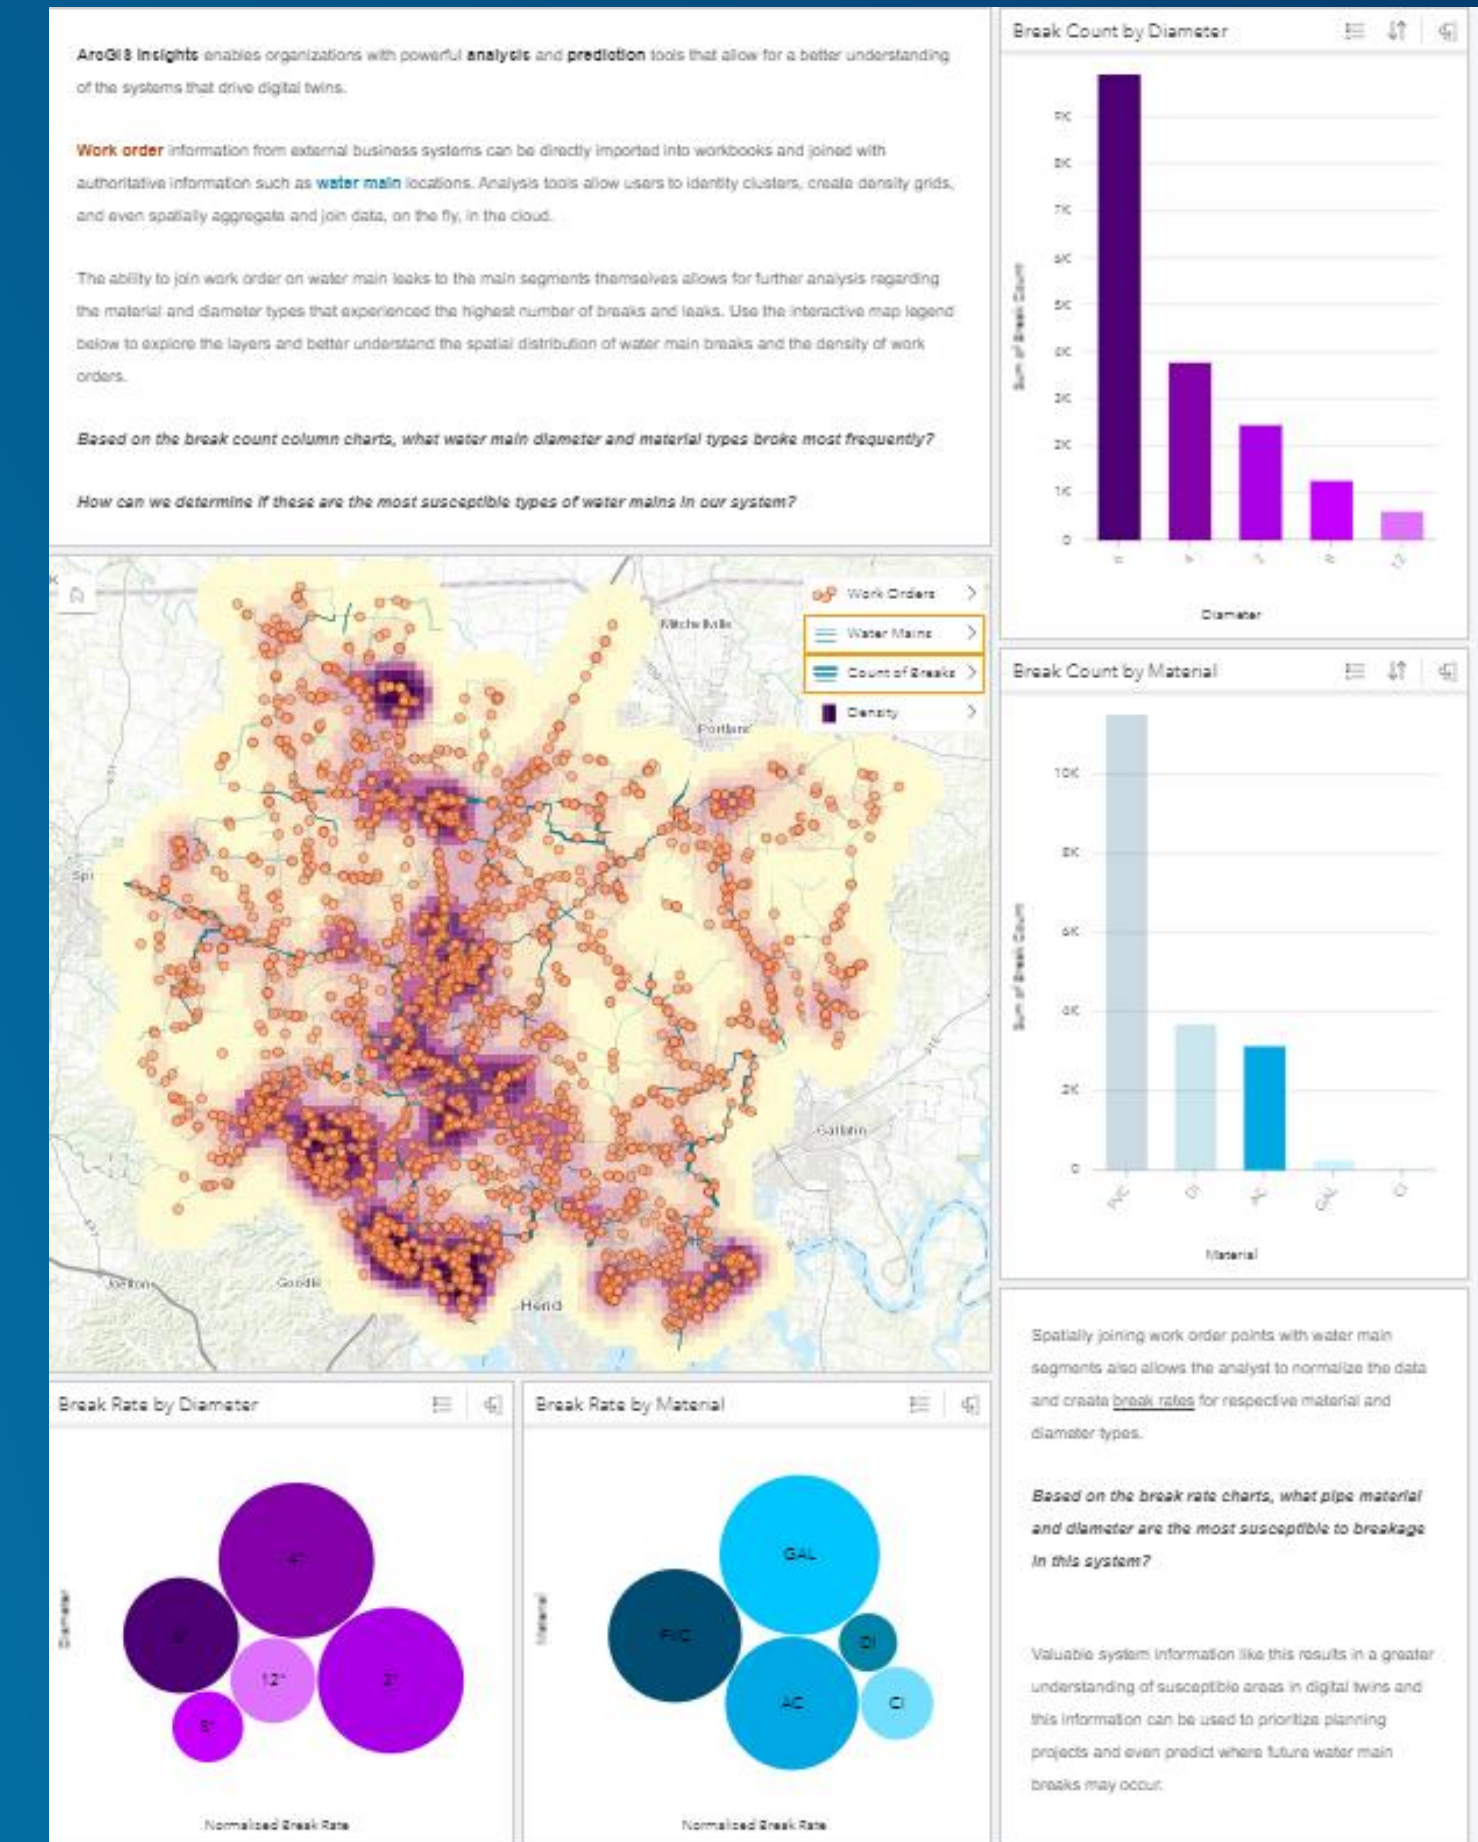

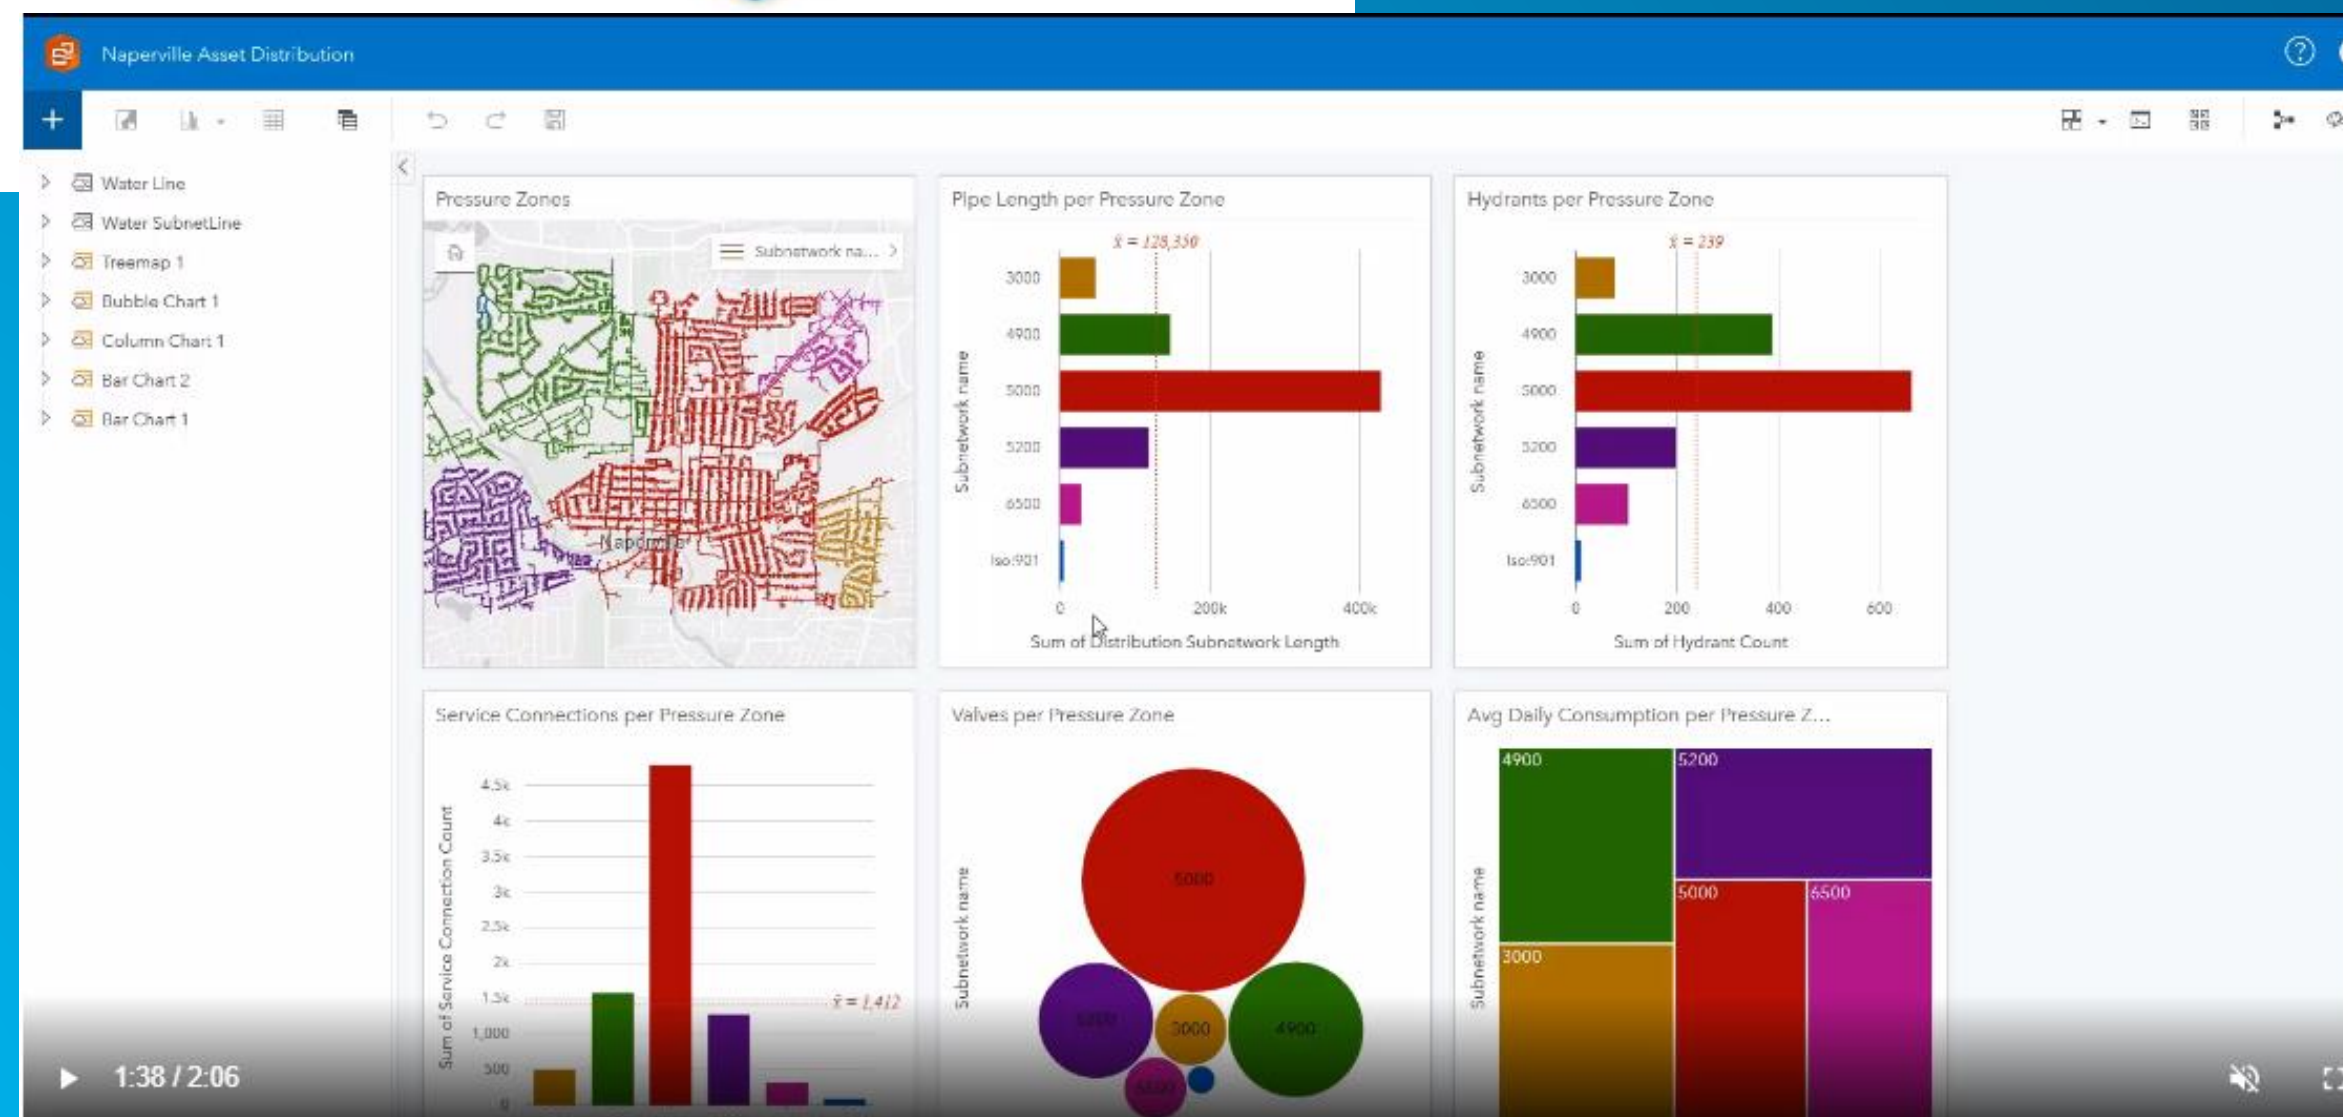

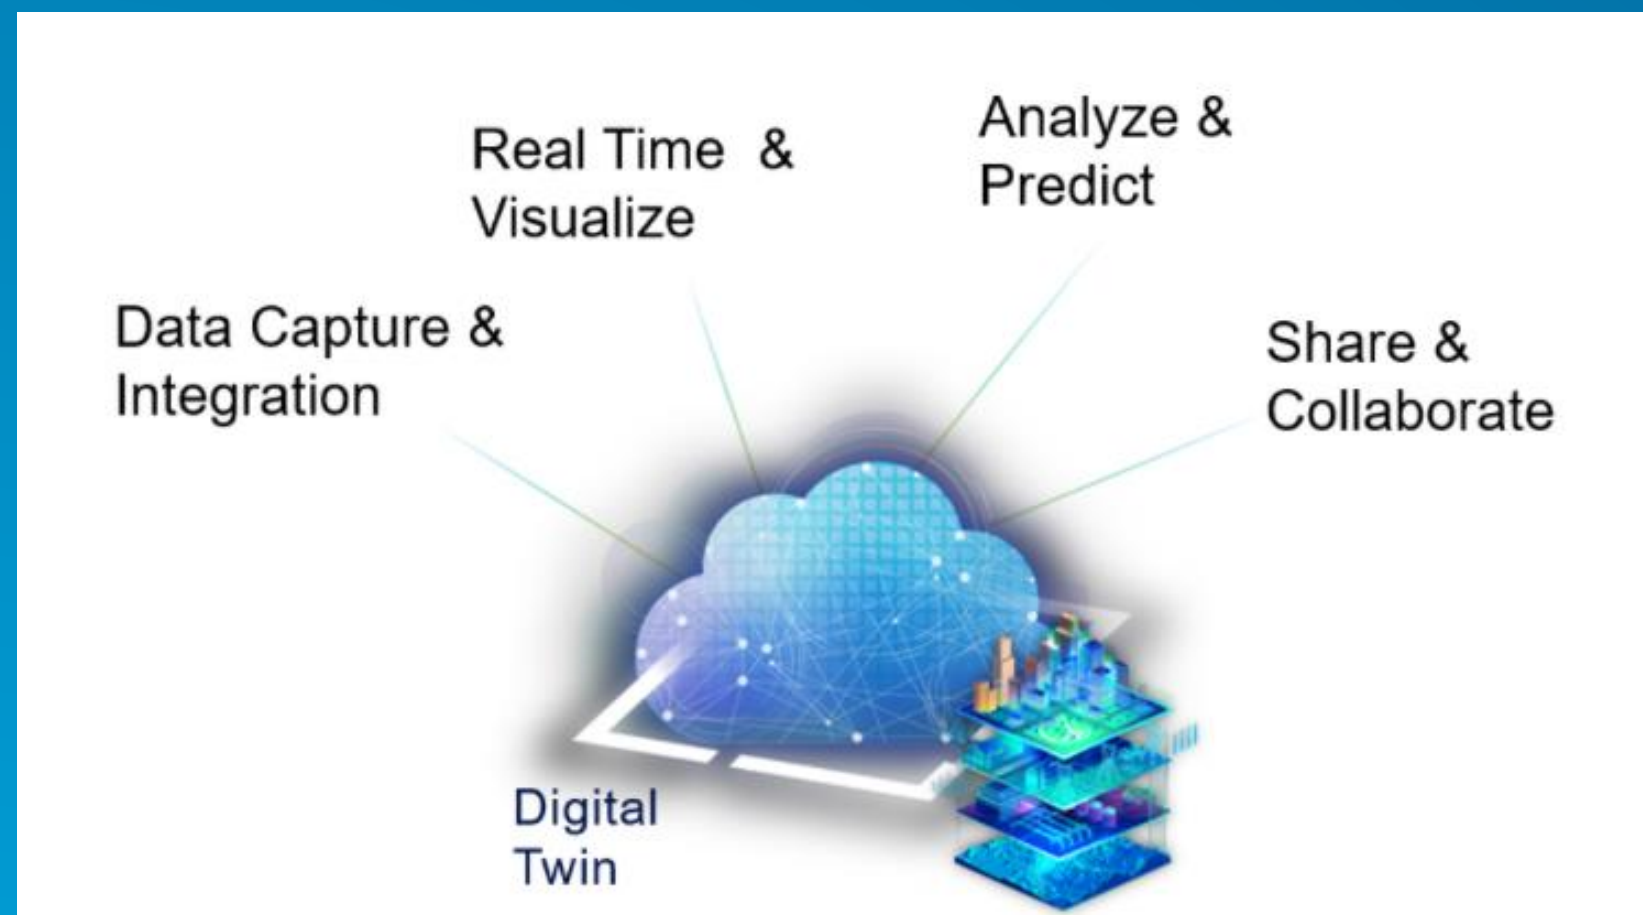

Digital Twins are virtual representations of the real world including physical objects as well as system processes, relationships, and behaviors.

Digital twins enable intelligent water systems

Elements of Digital Twins

Data Capture and **Integration** allow for the creation of the system of record

A Foundation for Digital Twins in Water (arcgis.com)

Water Distribution

Engage the public

Lead Service Management

Lead Service Management can be used to capture and manage information about lead service lines and inform the public about lead service line status in drinking water systems.

Citizen Problem Reporter

Citizen Problem Reporter can be used to solicit non-emergency problem reports (for example, blight, graffiti, trash, potholes, clogged drains, and flooding) from the general public.

Respond to main breaks

Water Outage

Water Outage can be used to quickly respond to main breaks, reduce water loss, and minimize impact to customers.

Optimize capital planning

Capital Project Planning

Capital Project Planning can be used to define a project portfolio, organize the portfolio into an official capital improvement plan, and share the plan with internal and external stakeholders.

Capital Project Tracking

Capital Project Tracking can be used to manage an active project portfolio, communicate project status, and share project updates with internal and external stakeholders.

Participatory Budgeting

Participatory Budgeting can be used to solicit community feedback to identify, discuss, and prioritize public spending projects.

Capital Improvement Planning

Capital Improvement Planning can be used to plan and estimate the cost of capital improvement projects.

Manage water distribution system data

Water Distribution Data Management for ArcGIS Online

Water Distribution Data Management for ArcGIS Online can be used to map assets, edit data, view water system maps in the field and office, view asset reports, and collaborate with map notes.

Water Distribution Data Management for ArcGIS Enterprise

Water Distribution Data Management for ArcGIS Enterprise can be used to map and manage asset information with the ArcGIS Utility Network.

Water Geometric Network Editing and Analysis

Water Geometric Network Editing and Analysis can be used to map and manage asset information using a geometric network.

Data Reviewer for Water Utilities

Data Reviewer for Water Utilities can be used to validate and improve the integrity of geometric network data sets.

Plans and Drawings

Plans and Drawings can be used to index the geographic extent of record plans and drawings and provide access to a catalog of source documents in the office or the field.

Sanitary Sewer

Engage the public

[Citizen Problem Reporter](#)

Citizen Problem Reporter can be used to solicit non-emergency problem reports (for example, blight, graffiti, trash, potholes, clogged drains, and flooding) from the general public.

Optimize capital planning

[Capital Project Planning](#)

Capital Project Planning can be used to define a project portfolio, organize the portfolio into an official capital improvement plan, and share the plan with internal and external stakeholders.

[Capital Project Tracking](#)

Capital Project Tracking can be used to manage an active project portfolio, communicate project status, and share project updates with internal and external stakeholders.

[Participatory Budgeting](#)

Participatory Budgeting can be used to solicit community feedback to identify, discuss, and prioritize public spending projects.

[Capital Improvement Planning](#)

Capital Improvement Planning can be used to plan and estimate the cost of capital improvement projects.

Manage sewer system data

[Sewer Data Management for ArcGIS Online](#)

Sewer Data Management for ArcGIS Online can be used to map sewer systems, edit data, view sewer maps in the field and office, view asset reports and collaborate with map notes.

[Sewer Data Management for ArcGIS Enterprise](#)

Sewer Data Management for ArcGIS Enterprise can be used to map and manage asset information with the ArcGIS Utility Network.

[CCTV Manager](#)

CCTV Manager can be used to create spatial data from closed circuit television (CCTV) sewer inspections.

[Water Geometric Network Editing and Analysis](#)

Water Geometric Network Editing and Analysis can be used to map and manage asset information using a geometric network.

[Plans and Drawings](#)

Plans and Drawings can be used to index the geographic extent of record plans and drawings and provide access to a catalog of source documents in the office or the field.

Stormwater

Engage the public

[Adopt-A-Catch Basin](#)

Adopt-A-Catch Basin can be used to operate catch basin adoption programs that allow volunteers to adopt storm drains and clean them for the community.

[Citizen Problem Reporter](#)

Citizen Problem Reporter can be used to solicit non-emergency problem reports (for example, blight, graffiti, trash, potholes, clogged drains, and flooding) from the general public.

Optimize capital planning

[Capital Project Planning](#)

Capital Project Planning can be used to define a project portfolio, organize the portfolio into an official capital improvement plan, and share the plan with internal and external stakeholders.

[Capital Project Tracking](#)

Capital Project Tracking can be used to manage an active project portfolio, communicate project status, and share project updates with internal and external stakeholders.

[Participatory Budgeting](#)

Participatory Budgeting can be used to solicit community feedback to identify, discuss, and prioritize public spending projects.

[Capital Improvement Planning](#)

Capital Improvement Planning can be used to plan and estimate the cost of capital improvement projects.

Manage stormwater system data

[Stormwater Data Management for ArcGIS Online](#)

Stormwater Data Management for ArcGIS Online can be used to map assets, edit data, view stormwater system maps in the field and office, view asset reports, and collaborate with map notes.

[Stormwater Data Management for ArcGIS Enterprise](#)

Stormwater Data Management for ArcGIS Enterprise can be used to map and manage asset information with the ArcGIS Utility Network.

[Water Geometric Network Editing and Analysis](#)

Water Geometric Network Editing and Analysis can be used to map and manage asset information using a geometric network.

[Plans and Drawings](#)

Plans and Drawings can be used to index the geographic extent of record plans and drawings and provide access to a catalog of source documents in the office or the field.
